

simply better

the MicroFuse® Rapid Rate Syringe Infuser for six-minute infusions

Syringe Infusion

Features

Benefits

MicroFuse Rapid Rate Syringe Infuser

The MicroFuse Rapid Rate Syringe Infuser was designed for specialty applications infusing doses over about six minutes. This infuser offers a number of advantages for rapid infusions, and is simple and easy to implement – at a very low cost. Simply better than competitive syringe infusers, the MicroFuse Rapid Rate Infuser is:

Safe

- Consistent flow rates within ± 3%
- Alarms indicate rate changes, occlusion detection, end of infusion and low battery
- No runaway doses

Easy-to-Use

- Simple controls require no programming
- One-handed syringe loading

Reliable

- Plunger "brake" prevents fluid backflow when unit is left ON
- Requires no preventive maintenance
- Internal self-check signals if the unit is malfunctioning

Efficient

- Microbore tubing does not kink and alter flow rates
- Minimal drug waste
- Two standard alkaline C batteries for 1,500 doses

Accessories

	Qty. Case	Order No. REF	Priming Volume	I.D.	Length
MicroFuse Minibore Administration Set	50	H938 607 5	≈ 0.5 mL	0.03" 0.8 mm	30" 760 mm
